Those who have not completed the form will not be allowed to take the medical checkup.</p> <p>②student card</p>								

【Notes.】

★Unlike the Special Health Examination for Radiation Handling Students, this medical checkup is not required by law for students.

If you anticipate any health problems (e.g., feeling sick, numbness at the site of blood collection, etc.) as a result of the blood collection, the risks are considered to outweigh the benefits of the medical checkup. In such cases, we would like to inform you that you may choose not to undergo this medical checkup. If you are at a loss to make a decision, the Center will make a decision on the day of the checkup, so please see the doctor.

(No changes have been made to the recommendation that students who handle organic solvents and specified chemical substances attend this medical examination)

★If you wish to receive consideration for a medical checkup, please contact us at the address below without making an online appointment. (Health checkup period cannot be changed.)
