What to bring	①Questionnaire distributed by each department (Table: Medical Questionnaire Back: Test Results) Please be sure to fill out the medical questionnaire and bring it with you. Those who have not completed the form will not be allowed to take this examination. ②Student ID card								

【Notes.】

★Unlike the Special Health Examination for Radiation Handling Students, this Health Examination is not required by law for students. If you anticipate any health problems (e.g., feeling sick, numbness at the site of blood collection, etc.) as a result of the blood collection, the risks are considered to outweigh the benefits of the Health Examination. In such cases, we would like to inform you that you may choose not to undergo this Health Examination. If you are at a loss to make a decision, the Student Health Care Center will make a decision on the day of the Health Examination, so please see the doctor. (No changes have been made to the recommendation that students who handle organic solvents and specified chemical substances attend this medical examination.)

* For those who wish to receive special consideration when undergoing the Health Examination (those who feel unwell when having blood drawn, or students who need special consideration (physical disabilities, etc.)), please contact the address below before October 14(Mon.) without making a Net reservation.
